

Aviation Security is an ever evolving, complex & versatile discipline requiring an in-depth knowledge of the background factors & historical elements leading to the contemporary international, regional & national security framework.

Understanding the international process & its necessary compromises is a must for identifying potential loopholes, risks & vulnerabilities of our local security systems & environment.

Anticipating potential attacks & acts of interference against our systems, with the objective of minimizing their impact to persons & infrastructures by maximizing resources & capacities of reaction, is an essential & sensitive factor for success which could only be achieved by extensive **Outside the Box Thinking.**

AVS&C offers its exclusive & in-depth experience of Aviation Security, Facilitation, MRTDs & Biometry Programmes with the International Civil Aviation Organization (ICAO) & worldwide Associations (ACI, IATA, IFALPA,...), to Industry Stakeholders & Partners willing to design & implement new, innovative, proactive & cost-effective Systems & Solutions which could guarantee adequate Security level together with high Quality of Service for all end-users, improved Facilitation & successful Operations.

All **AVS&C** specialists are recognized / certified by ICAO

Outside the Box Thinking in Aviation Security

Technical Audits, Risks & Vulnerabilities Assessments
Testing & Full Scale/Partial Exercises (ICAO type)
Training & Programme Development
Quality Control & e-learning
Facilitation, Biometry, MRTDs & Profiling
Airport, Screening Points & Crisis Management Design
